Claim Rejections - 35 USC § 112

1. Claims 1-5 and 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1:

At lines 2-3, the phrase “a scan circuit that allows said dynamic sequential device to be scan controlled and observed” cannot be understood. It is not clear which element scans and controls which element. In other words, it is not clear whether the scan circuit scans and controls the dynamic sequential device, or the dynamic sequential device scans and controls the scan circuit.

Claim 2:

At lines 6-7, the phrase “said input circuit and said output circuit that allow said dynamic sequential device to be scan controlled and observed” cannot be understood. It is not clear which element scan and control which element. In other words, it is not clear whether both the input and output circuits scan and control the dynamic sequential device, or the dynamic sequential device scans and controls the input and the output circuits.

Claim 3:

At line 3, the term “said scan state” lacks antecedent basis.

At line 4, it is not clear what is being controlled when the dynamic sequential device is in the scan state.

Art Unit: 2133

Claim 9:

At line 2, the term "said data" lacks antecedent basis.

Claim 10:

At line 3, the term "said test circuit" lacks antecedent basis or use of a term "said test circuit" is inconsistent. Consistency of a term should be used throughout claims.

Claims 4-5:

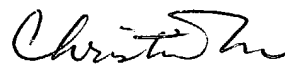

These claims are rejected because they depend on claim 1 and contain the same problems of indefiniteness.
